PROJECTS

VCOM

(Video communication platform)

Deployed Link: <https://vc-om.vercel.app/>

- Robust MERN-Based Video Communication : Vcom is built on the MERN stack.
- Advanced Meeting Management : It offers seamless meeting scheduling, automated meeting summarization, and comprehensive maintenance of meeting recordings.
- Enhanced Productivity and Organization : Vcom integrates advanced features to streamline virtual collaboration, boosting productivity and organization.

EVENTZ HUB

(Event management Hub)

Deployed link : eventshubseven.vercel.app

- MERN-Based Development : Evently is built using the robust and scalable MERN stack.
- Event Creation and Booking : It allows users to create and book events seamlessly.
- User-Friendly Interface : Evently provides an intuitive platform for efficient event management and booking.

TALKMATE.AI

(AI Companion)

- Advanced AI Companion with Next.js 13 : Learn to build a sophisticated SaaS AI Companion using Next.js 13, leveraging embeddings and the Pinecone vector database for long-term memory and Upstash Redis for fast caching.
- Robust Data Management : Utilize MySQL and Prisma for efficient storage of AI companions, ensuring reliable and scalable data handling.
- Seamless User Experience : Integrate the Next.js 13 App Router for swift client-side routing, Stripe for easy subscription management, and Clerk for smooth user authentication.
